Everett Baxter Jr Forensics, LLC

**This course is approved by the IAI Forensic Certification Management Board's Crime Scene Certification Board for initial crime scene certification and recertification**

Each attendee will receive a Shooting Incident Reconstruction workbook.

**Items each attendee is required to bring:**

- The attendees would need to bring:
- A scientific calculator
- Calipers
- Camera with a tripod

Hearing and eye protection will be required on days at the firing range. The attendee may bring their own hearing and eye protection, otherwise they will be provided.

## Course Description

The proper documentation of a shooting incident may allow for additional investigative information to be identified, such as:

- Identifying the parameter of where the shooter and/or victim were at the time of the shooting
- Determining whether or not a specific shot was possible, given the shooting documentation data
- Identifying where additional shooting related evidence may be located
- Statement analysis based on the shooting incident reconstruction

Attendees will begin with a review of the proper documentation of a shooting incident. Attendees will use the techniques taught in the course to perform various exercises to collect the necessary documentation data of the shooting incident, then will take this data and examine the data in an effort to reconstruct the incident.

The attendees will learn:

- The documentation required of each bullet defect within a shooting scene
- The scientific and mathematical tools necessary provide an analysis of the shooting incident.

The attendees will spend several days working on exercises associated with the mathematics. The attendees will also safely view live fire exercises at a pistol range. Some of these exercises are designed to validate and verify the shooting incident mathematical principles are in fact accurate. The live fire exercises will include shooting a vehicle and windshields and glass. The attendees will then examine and document bullet defects in the vehicle and glass.

## Instructor
